

# ADDENDUM #1

**PROJECT:** Townsend Avenue Intersection Capacity Studies  
**BID NO:** 22-014  
**FROM:** Scott Murphy  
**DATE:** June 20, 2022

---

## Questions and Answers

- 1. What meetings does the City envision being required for this project?*  
**Answer:** The City envisions project meetings for the following: project kickoff, methodology review with City and CDOT/demand forecasting, two to three during design to discuss options and which to pursue, and a final presentation of results and path forward with City and CDOT.
- 2. Who will be responsible for adjacent owner outreach and public engagement for this project?*  
**Answer:** These project elements will be performed by the City.
- 3. For the anticipated ROW acquisition exhibits, will these also require exhibits for temporary construction easements?*  
**Answer:** Yes – temporary construction easement exhibits are anticipated to be needed with each ROW acquisition exhibit. Separate standalone temporary construction easement exhibits are not anticipated on properties that don't include ROW acquisition.
- 4. Can third party aerial mapping services be used for the limited-scope survey discussed in the RFP Section 2.1.1(B)?*  
**Answer:** The City's goal with the survey scope of work is to understand which obstructions and existing conditions exist that would play into the feasibility and cost of intersection improvement alternatives. We are OK with whichever survey method would accurately create the basemap as necessary to make these determinations.

## Clarifications and Additions

1. None this addendum

## Plan Revisions

1. None this addendum
